

Audit-ready Bio Certifications with Cropster

Follow this simple guide to ensure Bio-Kaffee compliance with full traceability and smart reporting.

1

New Lot Data Entry

- Add “BIO” to new lot names
- Add date of registration & location
- Add ICO/PO numbers for easier tracking
- Select the lot’s certification type

2

Inventory Management

- Label stored and roasted batches across locations
- Manage separate storage with Location Tracking
- Keep track of mass balance including weightloss calculations

3

Scheduling Production

- Separate bio and non-bio roasting schedules
- Use Tasks for cleaning protocols to avoid cross-contamination
- Print labels while roasting with Roast Intelligence

4

Data & Traceability

- Add roast batch numbers to labels
- Keep track of roast dates with Production Reports
- Store links to bills of landing, invoices and more in your Roasts
